

VeraPoint Urinary Tract Infections Reagents

Our reagents can accurately detect common causative pathogens for urinary tract infections.

Lusis offers highly sensitive qPCR-based research assays for the rapid and precise identification of common pathogens, including *Escherichia coli*, *Klebsiella pneumoniae*, *Proteus mirabilis*, *Enterococcus faecalis*, and *Staphylococcus saprophyticus*, known to cause urinary tract infections.

Committed to Your Lab's Success

Lusis is committed to helping you for your research and development efforts with our molecular assays and world-class customer support.

Trusted By Customers

Our products are embraced by 10,000+ laboratories across 160+ countries worldwide.

Broad Range of Targets

Our team has developed 30+ key reagent products and hundreds of additional assays for pathogen targets.

World-Class Support

Lusis provides attentive technical and customer support to make your research and development programs successful.
